| 6                                                                                                               | CBE will finalize and implement the security management plan template that includes a security risk assessment and mitigation measures in relation to risks posed by its security arrangements to those within and outside the Operation site                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Security Management Plan                                                | 180 days after the effective date of the CoG |
| <b>Performance Standard 6: Biodiversity Conservation and Sustainable Management of Living Natural Resources</b> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                         |                                              |
| 7                                                                                                               | <p>CBE will develop a Biodiversity Management Framework that provides guidelines for developing Operation-specific Biodiversity Management Plans (BMP) and Biodiversity Action Plans (BAP) according to PS6. Specific guidelines in the framework will address the following, as a minimum, for:</p> <ul style="list-style-type: none"> <li>• <b>BMPs:</b> objectives, activities, Operation requirements, implementation schedule, institutional responsibilities and cost estimates.</li> <li>• <b>BAPs:</b> objectives for each biodiversity feature, actions and rationale for how the mitigation strategy will achieve net gain (or no net loss), approach for how the mitigation hierarchy will be followed, roles and responsibilities for internal staff and external partners, implementation plan and schedule, monitoring and evaluation plan, and stakeholder engagement.</li> </ul> | Biodiversity Management Framework                                       | 120 days after the effective date of the CoG |
| 8                                                                                                               | CBE will develop a risk-based procedure for preventing and minimizing bird and bat collision risk relating to wind power Operations and transmission lines. The procedure will integrate findings from ESIAs, and provide for post-construction fatality monitoring for at least 24 months and, where monitoring results indicate significant risk, enhancing mitigation measures and monitoring thereafter.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Bird and Bat Collision and Fatality Prevention and Monitoring Procedure | 90 days after the effective date of the CoG  |
